Understanding Naval Warfare Ian Speller 2018-08-14 This new and updated edition of *Understanding Naval Warfare* offers the reader an accessible introduction to the study of modern naval warfare, providing a thorough grounding in the vocabulary, concepts, issues, and debates, set within the context of relevant history. Navies operate in an environment that most people do not understand and that many avoid. They are equipped with a bewildering range of ships, craft and other vessels and types of equipment, the purpose of which is often unclear. Writings on naval warfare are usually replete with references to esoteric concepts explained in

specialist language than can serve as a barrier to understanding. The objective of this book, therefore, is to cut through the obscure and the arcane to offer a clear, coherent and accessible guide to the key features of naval warfare which will equip the reader with the knowledge and understanding necessary for a sophisticated engagement with the subject. This second edition is divided into two key parts. The first focuses on concepts of naval warfare and introduces readers to the ideas associated with the theory and practice of naval operations. It also includes a new chapter in which the history of the last century of naval warfare is explored in order to illustrate the key concepts. The second part focuses on the conduct of war at sea and on peacetime roles for contemporary navies. This latter section concludes with a chapter that looks ahead to the likely future of naval warfare. This textbook will be essential reading for students of naval warfare, sea power and maritime security, and highly recommended for those studying military history, strategic studies and security studies in general.

Ecological Interface Design Catherine M. Burns
2017-07-12 Ecological Interface Design delivers the techniques and examples that provide you with a foundation to succeed in designing advanced display graphics. The opening chapters introduce the "art" of interface design by exposing the analytical methods behind designs, the most common graphical forms, and how these methods and forms are pulled together to create a complete design. The book then incorporates case studies that further emphasize techniques and results. Each example exemplifies a solution to a certain part of the EID puzzle. Some of the examples demonstrate the analysis phase, while others apply more scrutiny to

graphical design. Each is unique, allowing you to use them in the development of your own designs. The volume concludes with an analysis that connects ecological interface design with other common interface design methods, enabling you to better understand how to combine approaches in the creation of design solutions.

Slave Stealers Timothy Ballard 2018-09-04 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--

the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Critical Terms for the Study of Gender Catharine R.

Stimpson 2014-07-11 "Gender systems pervade and regulate human lives—in law courts and operating rooms, ballparks and poker clubs, hair-dressing salons and kitchens, classrooms and playgroups. . . . Exactly how gender works varies from culture to culture, and from historical period to historical period, but gender is very rarely not at work. Nor does gender operate in isolation. It is linked to other social structures and sources of identity." So write women's studies pioneer Catharine R. Stimpson and anthropologist Gilbert Herdt in their introduction to *Critical Terms for the Study of*

Gender, laying out the wide-ranging nature of this interdisciplinary and rapidly changing field. The sixth in the series of "Critical Terms" books, this volume provides an indispensable introduction to the study of gender through an exploration of key terms that are a part of everyday discourse in this vital subject.

Following Stimpson and Herdt's careful account of the evolution of gender studies and its relation to women's and sexuality studies, the twenty-one essays here cast an appropriately broad net, spanning the study of gender and sexuality across the humanities and social sciences. Written by a distinguished group of scholars, each essay presents students with a history of a given term—from bodies to utopia—and explains the conceptual baggage it carries and the kinds of critical work it can be made to do. The contributors offer incisive discussions of topics ranging from desire, identity, justice, and kinship to love, race, and religion that suggest new directions for the understanding of gender studies. The result is an essential reference addressed to students studying gender in very different disciplinary contexts.

Disciple IV Abingdon Press 2005-05 DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John,

and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

MathLinks 7: ... Practice and homework book Bruce McAskill 2007

Special Relativity for Beginners Jürgen Freund 2008 This book, first appearing in German in 2004 under the title *Spezielle Relativitätstheorie für Studienanfänger*, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration

formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions. Author's website: www.relativity.ch.

Handbook of Stress and Burnout in Health Care Jonathon R. B. Halbesleben 2008-01-01 The purpose of this book is to summarise the state of the science in the study of stress and burnout among health care professionals. Moreover, this book seeks to set the agenda for future research in the areas of stress and burnout. Despite the popularity of these topics as subjects for empirical study, particularly among health professionals, there has been no attempt to build a comprehensive summary of the literature concerning stress and burnout in health care. This book fills the void by bringing together leaders in the academic study of stress and burnout and by summarising the research on the measurement of stress and burnout, the unique causes of this condition for health care professionals as well as the consequences of stress and burnout and the patients they serve. It covers evidence-based mechanisms for the prevention and reduction of stress and burnout. Each chapter provides a synthesis of the critical stress and burnout literature as well as ideas for what research is needed to fill current voids in the literature. Final chapter of the book provides a research agenda to promote research concerning this phenomenon in health professions.

Odes Sharon Olds 2016-09-20 Following the Pulitzer prize-winning collection *Stag's Leap*, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender "Ode to the Hymen," Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as "Ode to My Sister," "Ode of Broken Loyalty," "Ode to My Whiteness," "Blow Job Ode," and "Ode to the Last Thirty-Eight Trees in New York City Visible from This Window," Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.
